

process improving performance

Prism eSolutions is a proven world leader in implementing quality and environmental management systems. Our unique equation™ program is the only solution consisting of a web-based application combined with hands-on training and consulting services. The program is designed to enable your organization to pursue an "expertly guided, self-directed" path to implement or modify a Management System. We assist your company in achieving certification quickly and cost-efficiently.

A Unique Company

Prism eSolutions is a premier provider of ISO 9000 and ISO 14000 Web-based support services, training, and consulting for companies seeking certification in the manufacturing, healthcare, government, service, and education sectors.

Prism provides the tools and solutions companies need to cost-efficiently implement and continually improve business processes, specifically in the areas of ISO 9000 / Quality Management Systems, ISO 14000 / Environmental Management Systems, as well as other areas of strategic process improvement.

With over 200 years combined experience, we work with you to achieve certification quickly and efficiently.

Our unique equation™ program combines web-based technology with traditional consulting services and online training, minimizing your company's time and expense to implement, manage and maintain ISO 14000, ISO 9000, and other programs as well as the ISO 9001:2000 upgrade.

The equation program includes:

- Integrated document control and management
- Online training, plus on-site consulting
- An online reference library
- An effective communication system that integrates with your current email system
- A hosted solution that requires no software or hardware expenditures, or internal IT support
- Online systems for processing corrective actions, internal audits, and customer surveys
- A robust project management tool

Products & Services

Web-Based Solutions

Our solutions allow any size organization to utilize a web-based application and supporting infrastructure.

equationASP™

equationASP is hosted by Prism at a secure facility. The application's unique architecture eliminates upfront software and hardware costs, which are often a heavy burden on smaller companies seeking to improve their business processes. With the ASP technology, the application is available and accessible on demand, 24 hours a day, 7 days a week.

equationASP™ QMS - content is specific to ISO 9000 QMS

equationASP™ QMS Upgrade - content is specific to ISO 9001:2000 QMS upgrade

equationASP™ EMS - content is specific to ISO 14000 EMS

equationNET™

equationNET is licensed, installed, and managed on a company's network behind secure firewalls. It is the ideal choice for larger companies with the IT equipment, support, and the need to run the application in-house. With equationNET, companies can leverage their existing infrastructure for complete system control.

The equationASP platform and all content are available with the equationNET solution.

Benefits of the equation™ program

- Cuts on-site consulting time in half.
- Reduces implementation time by 50%, with improved project continuity and continual progress.
- Provides a business management system with templates and samples that provide a powerful tool to benchmark your business against best practices.
- Flexible, competitive, value-based pricing that allows your organization to determine how much consulting time it needs.
- Allows your company to choose its own schedule for registration.
- Minimizes paperwork and administration and can reduce ISO administrative costs by 80%.
- Provides a hosted solution that requires no software or hardware expenditures, or internal IT support.
- Instant access to on-going project status.
- Allows any size organization to cost-effectively implement a management system.
- Offers scalability for organizations with multiple sites. The system allows direct knowledge sharing between facilities, reducing meeting, travel and communication time and costs.
